The Education outlook Volume 48

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 792 pages. Dimensions: 9.7in. x 7.4in. x 1.6in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1895 Excerpt: . . . or difference of the squares on the portions intercepted by the circumferences may have a maximum. 12776. (Professor Lampe.)--Prove that in previous Questions, if given for the parabola $y^2 = 2px$, the least triangle $\triangle PQR$ for y , p , and the time of descent is a minimum J (ply) v. l, for $y = p/3$. 12777. (Professor Ionacio Brykns.)--- Domoutrer geometriquement la formule bien connue $(AB)^2 = (A-B)(A+B)$, 12778. (Professor Mori. ey.)--Prove that, when a bilinear substitution $z = \frac{ax + b}{cx + d}$ is periodic, that is, when it has n distinct values of x , when represented as points of the complex plane, are the vertices of a harmonic polygon. If we call such a system of points a periodic n -ad, prove that the 3 lines which join two periodic n -ads which have the same circumcenter and symmedian point meet at the polar of the symmedian point...

Reviews

An incredibly amazing ebook with perfect and lucid answers. It is written in basic terms and never difficult to understand. It has been written in an exceptionally basic way and it is only right after I finished reading this ebook in which it in fact modified me, affected the way I really believe.

-- **Beverly Hoppe**

Extremely helpful for all classes of individuals. Better than never, though I am quite late in starting to read this one. I realized this publication from my father and dad suggested this ebook to discover.

-- **Adela Schroeder II**
