## COMPUTER BRAIN

Createspace, United States, 2013. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.A brain is, after all is said and done, an interwoven web of electron pathways. From this maze of bio-logic circuitry are manifest the choices and actions by the self or what the self considers to be morally justified. But in the race to replicate the brain in a computer lab, what might the self do if the monetary prize is so high, the time too short, and the consequences of failure too life threatening? Competing for a \$30 million prize, a team is developing an unmanned lunar rover that performs well, perhaps even a bit too well. Aerospace writer Midge McConnell becomes suspicious of the hidden technologies behind the rover s performance. Her investigations will take her from Hollywood, to the halls of academia, through the Air Force s Satellite Surveillance Headquarters, onto a lethally guarded Texas research site, inside an exotic lakeside Chinese Traditional Medicine Sanatorium, and to a rocket launch base inside of China.
