NUMERICAL TREATMENT OF THE NAVIER-STOKES EQUATIONS

Notes on Numerical Fluid Mechanics
Volume 20

Vieweg & Teubner Verlag Jan 1990, 1990. Taschenbuch. Book Condition: Neu. 235x155x9 mm. This item is printed on demand - Print on Demand Neuware - The most frequently used method for the numerical integration of parabolic differential equations is the method of lines, where one first uses a discretization of space derivatives by finite differences or finite elements and then uses some time-stepping method for the the solution of resulting system of ordinary differential equations. Such methods are, at...
